

Johnny L. Limbaugh

Project Manager, Lee County MPO

Johnny Limbaugh is the Team Leader for the MPO's Performance Measure Committee and Project Manager for the Lee County Complete Streets Initiative \$10.4 million TIGER grant.

Limbaugh's career experience in transportation planning and programming includes public and private sector organizations with state, county and local jurisdictions and he has served in leadership positions with Florida DOT. He has managed project-specific highway and multimodal transportation plans and programs. He works extensively in public and agency outreach, transportation planning, regional and corridor-level programs, environmental planning and approval, finance and project design and development.

*Thank you for attending the 2016 Transportation Summit
Stay involved!*

"Give us your old, your broken, the bike yearning to be repaired and ridden again. Send these, the unused, the chainless and flat-tired to us for a new life in the hands of your local youth"

Streets Alive of SWFL mission statement

*Fostering a livable community through, activities,
advocacy, education and service!*

We repair and give a second life to used bicycles. Consider donating a used bike, a new bike, safety accessories (helmets, lights) or making a financial contribution ALL DONATIONS ARE 100% TAX DEDUCTIBLE
Contact us at saofswfl@gmail.com or 757-870-9105 to donate or learn more about this program. You can also drop off your donation at Fort Myers Schwinn Cyclery during business hours. Fort Myers Schwinn Cyclery one of our bike mechanic clinic program sponsors.

THANK YOU!

- 12:00** Adjourn

(John Szerlag cont.)

During his first year as city manager, he introduced a rolling three-year planning budget, used Interest-Based Bargaining in union negotiations, producing \$186 million in pension savings over a 25-year period and a detailed revenue model to illustrate Cape Coral's financial situation, resulting in the establishment of new revenue sources and economic sustainability for Cape Coral while maintaining Cape Coral as one of the most affordable cities in Florida.

Carl L. Schwing

City Manager, City of Bonita Springs

Schwing has served as Bonita Springs City Manager since June 2011. Prior to that he was the City Manager for Cape Coral. In 2014 Carl was named by Gulf Shore Business magazine as one of the 36 people in SWFL "who make things happen," and in 2013, he was credited as one of the instrumental individuals in the Hertz Corporation's decision to move from New Jersey to SWFL. Schwing holds the title of Credentialed Manager from the International City Management Association (ICMA). He was awarded the 2009 Strategic Leadership Award by the ICMA for his work in lean government. Schwing earned his Bachelor's Degree in Business Administration from St. Louis University, and a Master's Degree in Public Administration from the University of Missouri, St. Louis.

Saeed Kazemi, P.E.

City Manager, Fort Myers

With Master's Degrees in Civil Engineering and Engineering Management, Kazemi served the City of Fort Myers in Public Works for 15 years as an Engineer and Director before becoming city manager. Kazemi's experience in the fields of public works and engineering encompass extensive knowledge and understanding of the areas of construction, operation and maintenance, including work with roads, traffic, drainage, water distribution and wastewater. As city manager Kazemi is in charge of managing the day-to-day operations of the city, its annual budget and over 900 employees.

Bios

Salvatore Lacagnina, D.O.

**System Medical Director of Wellness & Employee Health
Lee Memorial Health System**

Dr. Salvatore Lacagnina of Dr. Sal, as he likes to be called, has a mission to motivate, educate and empower people to improve their health and wellness, emphasizing the prevention and reversal of cardio metabolic diseases, diabetes weight management, cancer risk factors and overall lifestyle medicine. A Lee Memorial Health System champion, he is responsible for developing a comprehensive health, wellness and preventive care program for some 10,000 employees and family members. He previously served as a Medical Director for the Lee Physician Group. Lacagnina earned a Doctor of Osteopathic Medicine from the New York College of Osteopathic Medicine, and is completing a Fellowship certification in Anti-Aging Medicine. He writes regularly in health and wellness for the News-Press and the Cape Coral Chamber of Commerce Trend publication and speaks publically throughout the community.

Marni Retzer

Mayor, City of Cape Coral

Marni Retzer is the first female Mayor of Lee County's largest city, Cape Coral, FL. She has a Master's Degree in Business Administration, and it's the President of Indigo Pros, a strategic marketing company which aids small to medium-size companies. She serves as the Executive Director of the Southwest Regional Manufacturers Association. Retzer spent the majority of her career in the insurance industry.

John Szerlag

City Manager, City of Cape Coral

Prior to arriving in Cape Coral, John served as city manager of Troy, Michigan and was Troy's assistant city manager for 10 years. He holds a Master's Degree in Urban Affairs from the University of Detroit and a Bachelor's Degree in Administration from Ferris State College.

Billy Hattaway, P.E.

District 1 Secretary, Florida Department of Transportation

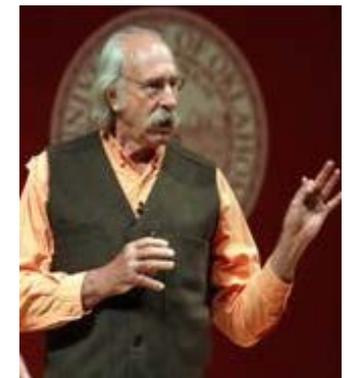

Billy Hattaway has over 35 years of transportation and program management experience with the Florida Department of Transportation and the private sector. In addition to his responsibilities as District Secretary, he is the champion for the State's Pedestrian and Bicycle focus Initiative and the Complete Streets Implementation Initiative to improve pedestrian and bicyclist safety and comfort in the State of Florida.

He is the chair of Bike/Walk central Florida, non-profit organization dedicated to safety for pedestrians and cyclists. Hattaway's professional experience includes transportation planning, streets design, safety and traffic analysis for a wide variety of transportation projects. Governing Magazine recognized Hattaway as a 2014 Public Official of the Year. He received the John Nolen Award from the Florida Chapter of the Congress for New Urbanism for his leadership on the Department's bicycle/pedestrian safety and Complete Streets initiatives.

Dan Burden

Director of Innovation & Inspiration and Walkability Expert, Blue Zones

From FDOT's first full-time bicycle and pedestrian coordinator to creating a healthier world, Dan Burden's work has influenced over 3,700 communities throughout North America. Burden has received multiple national honors.

(Dan Burden cont.)

He was the first recipient of the New Partners for Smart Growth Lifetime Achievement Award, peer selected as one of the “100 most important urban thinkers of all time” and named by TIME Magazine as “one of the most influential civic innovators”.

Burden was further honored as a white House “Champion of Change” in 2014. Burden created and popularized the walking audit and coined the term “road diet”. He has helped bring life and vitality back to numerous streets, priming private investment, increasing land values and integrating realistic traffic numbers and surrounding land use context.

Ian Lockwood, P.E.

**Livable Transportation Engineer
Toole Design Group**

Ian Lockwood has Bachelor’s and Master’s Degrees in Civil Engineering from Carleton University and is a Harvard University Loeb Fellow. In the 1990s, as City Transportation Planner for West Palm Beach, Lockwood led some of the first arterials calming projects in the country. In 2005, he helped coin the term “complete streets”, an idea about inclusive design, which has spread across North America.

Lockwood is a proponent of the “Path-as-Place” doctrine. Lockwood’s projects range from designing flexible-use public spaces, Main Streets projects, downtown, campus and city renewals to highway removal, all with the goal of increasing social and economic exchange. Ian is well published, has been a guest lecturer at several universities and interviewed on National Public Radio. For fun, he does photography, cartooning, and road cycling.

Paula Flores (Benway)

Associate Stantec Consulting Services, Inc.

Paula Flores, with over 29 years of transportation planning and traffic engineering experience, is the 2016 International President of the Institute of Transportation Engineers (ITE). She has extensive experience managing and performing a variety of transportation planning and traffic engineering projects with a focus in creating transportation choices in urban environments. Flores’ work and project success can be attributed to her string level of commitment, collaboration and creativity.

Samantha Thomas

Built Environment Manager, Blue Zones, LLC

Samantha Thomas runs the built environment program of Blue Zones. She has a Bachelor’s Degree in Urban Design from the University of Minnesota. She has worked with over 150 communities, building education, community capacity (social capital) and the needed partnerships to achieve street transformations that support healthier people and places. Thomas delivered a keynote speech to the Institute of Traffic Engineers (ITE) Midwest Division in 2015, which was described as “Clear, Visionary, Insightful, Challenging and Imaginative.”
